AUGUST 1ST - 15TH SPECIALS!

Items on special are available within the United States.

3M Science. Applied to Life.™

The 3M™ PPS™ Series 2.0 Spray Cup System

Better. To help make you better.

As a painter, you take great pride in your work. You know that the ultimate quality of the repair depends on the job you do in the paint booth. You don't have time to fool around with unproven tools or discounted supplies. Time is money, quality is king and you've got vehicles to move out the door.

Reinvented from connection to cup.

Improved six ways.

Adopted by painters in every corner of the globe, the 3M™ PPS™ System has been a major boost to painting productivity and quality for nearly 20 years. Now 3M has made it even better in six critical areas, from top to bottom.

Reinvented from top to bottom, it's designed to help make your life easier. To make your painting process cleaner and faster. And to make you a better, more productive painter—more confident in the quality of your work and better able to exceed the expectations of your customers and your shop.

**SPECIAL PRICING ENDS
AUGUST 15, 2023**

1 Wide Spout Adapter with Four-Point Connection. Maximizes stability while spraying. Makes cleaning easier.

2 Quarter-Turn Lid Locking System. Comes with every lid. Stays cleaner. Locks faster. Fewer parts to keep track of.

3 Domed Lid with Full-Diameter Filter. More paint below the filter improves flow and consistency, while reducing spitting from start to finish.

4 New Cup in Every Lid & Liner Kit. Start with a clean cup more often, reducing paint build-up. On-cup ratios and fill markings eliminate traditional mixing cups.

5 Access Window. Allows you to hold the liner for cleaner, easier lid removal when refilling. Also easier to check paint levels.

6 Larger Cup Sealing Plug. Allows you to seal and protect coatings upside down with greater stability when not in use. Use fewer lids by keeping filters wet.
