Introducing the 3M™ Perfect-It™ Random Orbital Polishing System — a professional-grade set of tools, pads and polishes — typically used in detailing shops, re-engineered for the collision repair industry. Unconventional, but welcomed change in process that allows you to get that show car shine, as if the car had never been touched. It's paint finishing redefined.

3M turned one of the most feared steps in automotive repair into one that any technician can master on their first go. Experience a system designed to work together — an easy-to-use polishing tool with specially-formulated liquids and pads. Your technicians should have no more fear of swirls, burn through, or other pitfalls common with traditional rotary buffing systems. Don't let paint finishing control you. It's time to take back control of the finish.
